PROFESSIONAL SUMMARY

B.Tech graduate (2026, 15 years full-time education) in Artificial Intelligence & Data Science with hands-on proficiency in Python programming, object-oriented design, and data structures & algorithms. Experienced in building and enhancing software components using modern frameworks (FastAPI, Flask) and REST APIs, with working knowledge of debugging, troubleshooting, and Git-based version control. Comfortable working in agile, collaborative environments, participating in code reviews, and supporting testing efforts to deliver clean, maintainable, and scalable solutions. Seeking a Custom Software Engineer role to design, code, and enhance software components while contributing to reliable, business-aligned solutions.

TECHNICAL SKILLS

Programming Language: Python (core focus), Object-Oriented Programming, Exception Handling, File Handling, Scripting

Frameworks & APIs: FastAPI, Flask, REST APIs

Databases: SQL, PostgreSQL, SQLAlchemy, Relational Databases, DBMS

Version Control & Tools: Git, GitHub, Git Bash, Debugging & Troubleshooting

Methodologies: Agile Methodology, SDLC, STLC, Data Structures & Algorithms

PROJECTS (PYTHON)

AI CRM Assistant for Healthcare Professionals

- Developed an end-to-end AI-enabled CRM application in Python to manage healthcare-professional interactions and generate actionable insights.
- Built the backend using FastAPI with PostgreSQL and SQLAlchemy, exposing functionality through well-structured REST APIs.
- Applied object-oriented design principles to structure reusable, maintainable Python components across the application.

Technologies: Python, FastAPI, PostgreSQL, SQLAlchemy, REST APIs

Heart Disease Prediction System

- Developed a Python-based machine-learning application to predict heart disease risk from structured healthcare data.
- Used Pandas and NumPy for data cleaning, preprocessing, and analysis; wrote clean, modular, and efficient code following best practices.
- Exposed model functionality through REST APIs built with FastAPI and Flask for integration with other services.

Technologies: Python, Pandas, NumPy, FastAPI, Flask, REST APIs

Automation Testing Scripts (Python)

- Created reusable Python automation scripts for login, navigation, and validation scenarios using Selenium WebDriver.
- Performed functional and regression testing, debugging script failures and troubleshooting issues to reduce manual testing effort.
- Followed a structured, iterative approach aligned with agile practices to continuously improve script reliability.

Technologies: Python, Selenium WebDriver, Automation Scripting, Debugging

EDUCATION

- B.Tech in Artificial Intelligence & Data Science – Viswam Engineering College, Madanapalli (2022–2026)
- Intermediate (MPC) – Bharathi Junior College, Madanapalli (2020–2022)
- SSC – Indian Public School (2019–2020)

PROFESSIONAL TRAINING & CERTIFICATIONS

- NPTEL Software Engineering Certified
- IBM Cloud Fundamentals

LEADERSHIP

- President, AI & DS Student Association
- Class Representative (CR)
- Organized hackathons, workshops, and technical events
