Professional Summary

Motivated Computer Science graduate with strong expertise in Core Java, Selenium Automation, and basic SQL. Skilled in developing backend applications and automating web testing using Selenium WebDriver. Strong understanding of Object-Oriented Programming concepts and software testing methodologies. Passionate about building scalable applications and improving software quality through automation.

Technical Skills

Java Development:

- Strong understanding of Object-Oriented Programming (OOP): Encapsulation, Inheritance, Polymorphism, Abstraction
- Good knowledge of Java fundamentals: Data Types, Operators, Control Statements, Arrays, Strings
- Experience with Exception Handling, File Handling, and Collections Framework (List, Set, Map)
- Basic knowledge of backend development and application logic building

Automation Testing:

- Selenium WebDriver with Java
- Automating web applications (Login, Navigation, Validation flows)
- Writing reusable automation scripts and methods
- Basic understanding of TestNG framework

Manual Testing: SDLC, STLC, Test Cases, Bug Reporting, Functional Testing

Database: SQL (Basic Queries, Joins, CRUD Operations)

Tools: Git, GitHub, IntelliJ IDEA

Concepts: OOP, Basic Data Structures

Projects

Student Tracking System — Core Java Project

- Developed a Java-based application to track and manage student records including add, update, delete, and view operations.
- Implemented Object-Oriented Programming concepts for modular and maintainable code.
- Used SQL for storing and retrieving student data from the database.
- Applied input validation and exception handling to ensure data accuracy.

Automation Testing on SBI Website — Selenium Java Project

- Developed automated test scripts using Selenium WebDriver with Java.
- Automated user workflows such as login, navigation, and validation scenarios.
- Implemented reusable functions to improve test efficiency and maintainability.
- Reduced manual testing effort by automating repetitive test cases.

Manual Testing on SBI Website — Testing Project

- Conducted manual testing on the SBI web application.
- Created and executed test cases for login, registration, and validation features.
- Identified and reported bugs with proper documentation.
- Applied SDLC and STLC methodologies during testing process.

Internship

Java Full Stack Web Development Intern

July 2024 – Sep 2024

Prodigy Infotech Pvt Ltd

- Developed web applications using Java.
- Assisted in backend development and API integration.
- Worked on debugging and improving application performance.
- Collaborated with team members to enhance code quality.

Education

B.Tech in Artificial Intelligence & Data Science

2022 – 2026

Viswam Engineering College, Madanapalli

Intermediate (MPC)

2020 – 2022

Bharathi Jr. College, Madanapalle

SSC (Class 10)

2019 – 2020

Indian Public School

Certifications

MERN Stack – AlgoPrep

IBM Cloud Fundamentals

NPTEL IoT

Declaration

I hereby declare that the above information is true to the best of my knowledge.
